

This application is a continuation of a [similar development](#) for VirtueMart 1.X.X but maintained separately, in the form component. It's much easier to install and requires no intervention in the code of the VirtueMart. After installation, you need to add only one line in the file VirtueMart and you can use the functionality. This allows you to also update VirtueMart, unlike hacks store, which will certainly fall off. What and where to paste written in help **vmBranches**

. Component makes additional functionality shop, developed to VirtueMart 2 and Joomla 2.5 - every city has its price.

## Upgraders

If you are an experienced Joomla! user, Joomla! 1.5 upgrade site will seem familiar.

There are new features and improved user interface. Most functions are the same.

The biggest change is the improved access to the Joomla! documentation.
